

DEPARTMENT OF PHARMACOGNOSY

The Pharmacognosy Lab in D Pharmacy programs is dedicated to the study of natural products derived from plants, animals that are used in pharmaceuticals. Here's an overview of what typically happens in the Pharmacognosy Lab:

- 1. Plant Identification and Collection
- 2. Extraction Techniques
- 3. Purification and Isolation
- 4. Microscopic Evaluation
- 5. Herbal Formulation Development
- 6. Safety and Regulatory Aspects

The Pharmacognosy Lab is essential for D Pharmacy students as it provides hands-on experience in the identification, extraction, and analysis of natural products used in traditional and modern medicine. It prepares students for roles in pharmaceutical research, herbal drug development, quality assurance, and regulatory affairs related to natural products.

PHARMACOGNOSY LAB

GLIMPSES OF FACILITIES AVAILABLE:

S. No.	Name
1.	Microscopes
2.	Digital Balance (10 mg Sensitivity)
3.	Projection microscope
4.	Permanent slide set of plants and charts for
	Pharmacognosy Lab
5.	Drug information resources
