## 1. YouTube channels are created for students

1. Upon analyzing the syllabus, it became evident that utilizing PowerPoint presentations would be an engaging method to deliver course content. These presentations incorporate subject-related images, short videos, point wise narration and organized chapter-wise presentations, enhancing understanding and retention among students.
2. Recognizing the effectiveness of audio-visual aids, faculty members collected educational videos available on platforms like YouTube or other educational websites. Additionally, faculty themselves created videos, sharing the links with students. Notes and MCQ-pattern questions based on these videos were also provided to further aid learning.
3. In addition, a fast Internet facility (32mbps) is provided via Wi-Fi, enabling students to engage in self-learning and access a wealth of knowledge instantly. This Internet facility supports various learning activities, and a digital library has been established to provide students with digital resources for studying, project work, and information sharing, and accessing related documents.

## 2. Student mentoring system implementation

### Mentor: Mentee meetings

- Mentor: Mentee meetings were arranged weekly and progress of mentee student is communicated to Parents.
- Regular mentor-mentee meetings were arranged to address student concerns and offer educational, moral, and mental support, fostering personal growth and development.
- Main benefit to to conducting of Mentor: Mentee meeting A mentorship involves sharing knowledge, experiences, and feedback. The goal is to help the mentee navigate challenges, develop skills, and achieve their own goals. enhances communication skills, emotional intelligence, and the ability to work effectively with others
- Mentoring provides students emotional and instrumental support, guidance, encouragement and better environment in college.
- Mentor Mentee Program is an essential component for a successful career as it bridges the gap between the faculties and students
- A mentor should provide guidance and support, while a mentee should be coachable and willing to learn. Additionally, a mentee should have an open mind, be respectful and be able to take feedback positively.
