ICT tools apart from the traditional chalk and board method of teaching. **Shivajirao S. Jondhle college of Pharmacy** believes in blended technique of teaching for effective learning.

In the beginning of each academic year, our Basic aim is, to conduct an induction program for newly admitted first year students. Where students are introduced to the academic incharge who will give a blueprint of the academic calendar for whole year.

A general orientation is given to students about syllabus. Students are provided PPTs, notes etc. The syllabus contents are delivered with the aid of effective audio-visual and multimedia elements and interactive teaching.

As well as exam in charge who **dictates** examination scheme. Plus cultural activity incharge who dictates the planned extracurricular activities and even looks out for new innovative ideas from students.

For the Complete year staff creates some informative experimental videos and then links are shared amongst the students. The books referred by the teachers are always available in the library for all students. According to the syllabus a set of laboratory manuals is provided for experiments.

The set the plan is Set in accordance to the weightage of chapters and available timespan for both theory and practical.

Coming to the projects, when the field visit for each subject is completed, students are encouraged to write descriptive reports based on their learning and experience and then submit it to the college as a project.

Academic in charge conducts two meeting of Institute curriculum implementation unit (ICIU) in an academic year to make sure that work flow is going as par the guidelines and academic calendar.

The reports are submitted to the Principal for necessary action. On the basis of these reports, necessary changes in the infrastructure and human resource facilities are done.

**Measures taken for delivering the content beyond syllabus for bridging the gap of prescribed syllabus: for the session 2022-23 (CAY)**

At the end of each session the reports of various activities conducted as per the academic calendars were submitted to the Head of Programs with impact analysis done on the basis of feedback taken from the stake holders after the event for further continuation or discontinuation of the event.

### **2.3 INITIATIVEES IN TEACHING AND LEARNING PROCESS (15)-**

**(Implementation of teaching-learning process and initiatives in improving instruction methods, the quality of laboratory experiments with regards to conduct, record observations, analysis and continuous evaluation, encouraging bright students, assisting week students etc. The initiatives, implementation details and impact analysis need to be documented).**

Analyzing the syllabus, we realized that PowerPoint was an interesting way where we can use subject related pictures, short videos, pointwise narration and chapter wise presentation.

As audio-visual information works effectively, the faculty referred some educational videos that are easily available on YouTube or some educational sites. Moreover, faculty members themselves created some videos shared the link amongst the students.

Also based on these videos notes, and MCQ pattern type question-answers were provided.

To increase student interest, we conducted various competitions based on topics in current syllabus. Such as poster making competition, model making competition, paper presentation, technical quiz competition etc.

However, when it comes to the real life knowledge of all the subjects, industrial visits and hospital visits are organized. We also brought digital media projectors and smart classrooms.

We also brought digital media projectors and smart classrooms.

A fast Internet facility (32mbps) is provided through Wi-Fi to the students for self-learning and on the spot availability of various kinds of knowledge.

Internet facility is provided through Wi-Fi to the students for self-learning on the spot availability of various kinds of knowledge. We also brought digital media projectors and smart classrooms.

on the spot availability of various kinds of knowledge. We created a digital library where students can get digital help to study, projects, sharing information, or any document related help.

To know the importance of medicinal plants, we arranged a visit to 'Shiv udyan' medicinal garden.

We arranged mentor-mentee meeting several times in search of student's problems and to provide educational, moral, mental help on next level.

By creating actual drug museum in college we demonstrated different dosage forms to students. Highly qualified experts were contacted for students to acknowledge today's market and current industry update.

Camps like health check-up, awareness about communicable diseases, blood donation, orphanage visits were arranged which itself is a kind of social service, and a small act of kindness for the needy people but on the other hand, students learned health issues in society. It will give them a new aspect and inspiration in studies, work and career.

Expert lectures on Personality development, career counseling, and communication skill were arranged to motivate, sculpt and enhance the personalities of these young citizens of society.

Students were encouraged to participate in intercollegiate festivals and compilations to get various opportunities to conquer the new levels and proofs of their capabilities.

We made campus placements to take place on wider range to get the spectacular careers started.

## **2.4 INITIATIVES RELATED TO HOSPITAL AND OTHER RELATED INTERACTIONS (10)**

(Give details of the industry/ hospital involvement in the program such as industry- supported laboratories, partial delivery of appropriate courses by industry experts and/or collaborative initiatives with the hospitals etc. Mention the initiatives, implementation details and impact analysis)

over the period of three months.

On the completion of the training, the students are asked to submit a report of same and one duplicate copy of training certificate is retained by the institute. A short individual interactive session is held with training cell regarding their observation and experience during training. The evaluation of the training is done on the basis of interaction and report submitted by the students. Students are benefited from such training as they develop the skills required for running drug store as per the rules of Drug and Cosmetic Act -1940. They get confidence and practical knowledge from such trainings. They also get help in the placement for their future career development.

We give set of Five Question That is A,B,C,D and E and Evaluate

Institute has established an Entrepreneurship Development Cell. Under this cell, students are motivated for entrepreneurship. For this purpose, the cell organizes guest lecturers from nearby successful entrepreneurs and renowned alumni on different topics including skill development and source of finance..

Apart from the above activities, department time to time organizes guest lectures and workshops as a part of skill development program for students and staff and the details of the skill development program conducted in last three years are given below

**Table a: Skill development program conducted for Students:**

Academic Session	Sr. No.	Name Of Event	Date Of Conduction	No. Of Beneficiaries	Benefits
2020-2021	1	A guest lecture on Corporate trainer and motivational speaker by Miss. Rehan Changi	04/02/2020	100	Skill development
	2	A guest lecture on pharmaceutical chemistry by Mr. Sandip Mavchi	04/02/2020	100	Skill development
	3	Blood donation camp	24/01/2020	100	
	4	Visited to Government sub district Hospital	07/01/2020	101	Skill development
2021-22	1	Guest lecture on Novel Drug Delivery System	19/03/2022	99	Skill
