P9. Sample best and average Project reports

Every student is required to undergo a 300 hour training program under a registered pharmacist, spanning three months. Upon completion, students are tasked with submitting a comprehensive report detailing their experiences, with the institute retaining a duplicate copy of the training certificate.

To further gauge the effectiveness of the training, individual interactive sessions are conducted with the training cell, where students discuss their observations and experiences. Evaluation is based on these interactions and the submitted reports, allowing students to develop the skills necessary for operating a drug store in compliance with the Drug and Cosmetic Act of 1940. This practical training instills confidence and provides invaluable real-world knowledge, aiding in students' future career placements.

To assess students post-training, a written exam consisting of five questions sets (A, B, C, D, and E) is administered. This evaluation method ensures a comprehensive understanding of the training outcomes.
